MISSION STATEMENT

The mission of the National Law Enforcement CBRNE Training Center is to enable United States First Responders to prevent, prepare for, respond to, and recover from the full spectrum of CBRNE threats. These threats include natural disasters, virulent pandemic disease, industrial accidents and acts of domestic and international terrorism involving *Chemical, Biological, Radiological, Nuclear, and Explosive, (CBRNE)* weapons of mass destruction. The Center accomplishes its mission through training, research, evaluative services, technical services, and equipment sourcing and supply.

GOALS

1. Increase the state of mission readiness for local, state, and federal public safety agencies, and the critical infrastructure/key resource private sector through the development, delivery, and improvement of training and technical services related to preventing and responding to the full spectrum of CBRNE threats.
2. Identify research needs and conduct research for the improvement of the public safety response to the CBRNE threat spectrum.
3. Serve as a central coordinating body between academic researchers, technology based university researchers, private industry, and public safety in the development of new CBRNE agent detection and protection products and methods.
4. Provide public safety agencies and the critical infrastructure/key resource private sector with a one-stop point of contact for the sustainment of their CBRNE protection operations, providing for hardware development, equipment sourcing, supply, and maintenance.
5. Assist the first responder community in the development and implementation of leading edge CBRNE counter-terrorism tactics, procedures, and policies.
6. Improve understanding, communication, and cooperation between private sector first responders, scientists and local, state, and federal government agencies that must effectively work together in responding to a CBRNE incident.

Why your organization should consider on-site training from the:

National Law Enforcement CBRNE Training Center

- 1) You can reduce your organization's training costs by hosting one of the CBRNE Training Center's professional training programs at your location. Eliminating the travel, lodging, and per-diem expenses associated with out-of-town training.
- 2) You can provide your staff with courses that are tailor-made specifically for your organization, using the equipment owned & operated by your organization and utilizing your standard operating procedures and policies.
- 3) You can bring the CBRNE Training Center's highly qualified instructors to your organization. Your organization's on-call staff are not taken away from their 24/7 local response duties.

If you have any questions regarding any of the on-site training programs, contact our On-Site Training Coordinator at (813) 902-9234 or Email us at info@nlecbrne.com
